

The Foundation ties programs together with learning. Knowledge is power and providing tools to navigate through recovery is vital to success.

The gateway to sport, we provide Motorsport opportunities throughout North America. The networking and fellowship of the social and team focused events help individuals to connect with a wide range of support. The program offers two levels based on wants and needs: Diversionary Therapy and Motorsports Immersion

The next phase in our recovery process. Here beneficiaries begin their individual needs analysis and complete studies, training, and placements, with schools, teams and partners.

Through involvement, coaching and experience, it empowers beneficiaries to increase their autonomy and self-determination.

Vision

To use Motorsports opportunities to attract ill, injured, and wounded Service Members and disabled Veterans and present them with educational and industry opportunities to aid in their retraining, recovery, and rehabilitation.

Motorsports Immersion

Through race team immersion, teams provide opportunities with specific roles such as tire, fuel, fabrication, or engine technician, data analysis, public relations, media, marketing photography, hospitality, videographer, logistics, driver assistant, and vinyl tech. The Motorsports Immersion program exposes beneficiaries to career opportunities in motorsports and prepares them for the next step: the Engage program.

Driver Development

We use the eMotorsport iRacing program as an entry point into the exciting world of driving race cars.

Racing

We understand that soldiers never lose that competitive desire. Whether as a crew member, a driver or in a support role, we provide the team and a purpose.

**“Change is inevitable.....
Growth is optional”**

Karting

A gateway to the thrills of motorsports competition and driving on a racetrack. Karting can be a sports equalizer with maximum inclusion while challenging individuals while providing a diversion.

Car Clubs and corrals

Like minded environment that encourages inclusion and a diversion, making new friends and enjoying a passion.

Giving back

We encourage beneficiaries to give back by introducing the Foundation to fellow service members, speaking at transition units, volunteering or continuing to be an active member in our racing program.

Motorsport 101

This is where we introduce beneficiaries to the world of professional motorsports. A one-day introduction in a relaxed setting that allows the individual to ask questions and decide if this is the right step without stress or pressure.

eMotorsport 101

The Operation eMotorsports iRacing League is a structured virtual racing series that brings together beneficiaries, veterans, military members, race car drivers/crew members, and other supporters of the foundation to compete in a friendly virtual sports sports car racing environment.
