

## WELCOME TO THE OPERATION MOTORSPORT ACADEMY PROGRAM

Whether you are a seasoned racing enthusiast or know absolutely nothing about motorsports, the Operation Motorsport Academy Program is here for you.

Utilizing motorsport-specific learning modules to assist in preparing beneficiaries for the world of motorsport, we support our core values of TEAM, IDENTITY & PURPOSE for medically retiring/retired service members. We do this by offering recreation, social integration, learning and diversionary programs through opportunities that arise in motorsports.

Our **Diversionary Program** starts the path of recovery with virtual engagements in eMotorsport or a day enjoying an event as a race fan with other veterans and fans.

Our **Motorsport Immersion Program** embeds a beneficiary into an actual professional race team with opportunities to work in areas like tire tech, fuel tech, mechanical, data, PR, media, photo/videography, hospitality, logistics, driver assistance, and more. Under the guidance of the professional team, a beneficiary is provided with opportunities to use existing, transferable skills, developing a renewed sense of purpose, and aiding in recovery.
